

# SALMON

## GROWTH LIGHT

a part of our AQUA-FASTGROW solution

**LAKSESOL® 300XL** is a powerful "tried & tested" LED biological growth/maturation light that are intended for use inside salmon/fish RAS tanks. This light system can be setup to cover different levels inside a tank for better illumination. Using this light system gives the smolt/fish better conditions for grow up and faster growing rate. Typical we look at 20% faster growth using this light system.

- Smolt & Salmon growth light
- Dimming 0-10V or PWM
- Easy and quick installation
- Wide input voltage range

### Technical specifications:

- Effect: 300 Watt/Section
- Brightness: 3900lm/section
- Light color: Special
- Light angle: 120 degree
- Working temp.: -30°C til +60°C
- Waterproof: IP68-50M
- Material: Stainless steel 316
- Voltage: 90-480VAC 50/60Hz
