WELLBOAT LIGHT

a part of our AQUA-FASTGROW solution

FUPELED-50D2 is a dual color LED floodlight for use in air and water. This LED light is designed to be used in wellboat water tanks for transporting salmon. The light color can be switched from white to green, where white is used during inspection and cleaning of tanks while green is used during fish handling and transport. This light is made of stainless steel 316 and withstand sea water and corrosive environments.

- Smolt & Salmon tank light
- 2-color system
- Easy installation and handling
- Robust construction

Technical specifications:

- Effect: 2x36 Watt
- Brightness: 2x4320lm
- Light color: White or Green
- Light angle: 90°
- Working temp.: -30°C til +60°C
- Waterproof: IP68-10M
- Material: Stainless steel 316
- Voltage: 85-265VAC 50/60 Hz
- Size: ø180x230xL150
- Weight: 5,5kg
