

SALMON

GROWTH LIGHT

a part of our AQUA-FASTGROW solution

LAKSESOL-5120W is a powerful LED light for use in offshore salmon sea cages. This innovative and special light is designed to be used in the middle of the cage to make a lightfloor on deeper water for the salmon. The effect is that the salmon stays at deeper water to reduce the sea lice problem. It is also a possibility to add one or two more light to this system for even deeper lighting.

- Salmon growth light
- 5120 Watt
- Robust construction
- Easy installation and handling
- Modular concept

Technical specifications:

- Light effect: 5120 Watt
- Brightness: 563200lm
- Light color: Special
- Light angle: 120°
- Working temp.: -30°C til +60°C
- Waterproof: IP68-50M
- Material: Stainless steel 316
- Voltage: 200-480VAC 3 phase
- Size: 1000x1000x300mm
- Weight: Air 230kg, Water 110kg
